
Kashyap Singha Phukan

Studio Head

Psypher Interactive

Involved with Psypher Interactive as Studio Head and Partner. Working with the team and managing projects comes directly under my portfolio here. We have been working with MPL and Hike-Rush are two of our major clients to name. Manage lean development teams and work towards the goal with an efficient and procedural work structure. I love to code, can co-op with most of the programming languages and encourage myself to learn new tech. I like to work in gameplay mechanics and mission scripting. System architecture designing for gaming project is what I am currently involved in.
